

ASA|P BAM-1A Wall

Triple Protection Ballistic (UL8), Blast and Forced Entry

The BAM-1A Wall is our heavy-duty product. This patented wall delivers a proven triple protection security for all kind of attacks.

Anti-Ballistic - Up to the highest UL Level-8.

Anti-Forced Entry - US Department of State (DOS) certified for 1 hour.

Anti-Blast - US Department of State (DOS) certified perimeter wall or exterior wall protection

All the above easily combine with anti-eavesdropping mesh and proven anti-blast windows and doors.

Sound Deadening Capabilities: With an STC of 55 or better.

Fire Resistant: Offering a one hour plus fire rating. Meets flame spread/ smoke development criteria.

Freedom of Design and Finish: Interior is sheet rocked allowing variety of finishes. Exterior may be stucco, brick, stone or other.

High Insulation Value: Minimum R40.

Cost Effective: Save on foundation costs, save on time of construction, save by using normal finishes.

Rapid Installation: High speed versus traditional concrete or steel plate wall systems.

Sizes: 4ft x 8ft to 4ft x 12ft

Thickness: 10inches

ASAP Walls

28370 St. Michaels Road
Easton, Maryland 21601

Anti-Ballistic

ASAP developed its own proprietary panel connection system. One UL 752 Level 8; NIJ III

Struck 5 times by 30/06 Field Rifle:

Full Metal Jacket Bullets

Velocity @ 2800 fps

Shot pattern: 4 1/2 square inch

Anti-Blast

This is the ASAP wall that survived multiple blast at Quantico, Virginia during a live demonstration with 50lbs of TNT at 20 feet.

The wall was also tested under a shock tube test with Baker Risk in Texas that equated to 2,000lbs of TNT at 100 feet.

ASAP passes Department of State (DOS) test for anti-blast integrity!

Anti Forced Entry

ASAP gets the Department of State Level 2 Forced Entry Certification.

Two separate wall 'attacks', one on center of field, one on seam.

A 6-man team attacks the wall with hand tools.

Level 1 Certification: 15-min. Resistance

Level 2 Certification: 1-hour Resistance
